Under the authority of the *Pest Control Products Act*, Health Health Canada's Pest Management Regulatory Agency (PMRA) has approved the addition of new uses on various food commodities to the product labels of Dupont Altacor or Dupont Coragen Insecticides, containing technical grade chlorantraniliprole. The specific uses approved in Canada are detailed on the labels of Dupont Altacor and Dupont Coragen Insecticides, *Pest Control Products Act* Registration Numbers 28981 and 28982, respectively.

Corresponding MRLs were proposed in the consultation document published on 20 March 2012, Proposed Maximum Residue Limit PMRL2012-01, *Chlorantraniliprole*. Import MRLs for coffee and rice were also proposed in PMRL2012-01. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect in Canada as of the publication date of this document and either replace or are in addition to the MRLs established for chlorantraniliprole.

Established Maximum Residue Limits for Chlorantraniliprole

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Chlorantraniliprole	3-bromo-*N*-[4-chloro-2-methyl-6-[(methylamino) carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1*H*-pyrazole-5-carboxamide	9.0	Peppermint tops, spearmint tops
		2.5	Stone fruits (Crop Group 12-09)[a]
		1.0	Coffee (instant)
		0.4	Pome fruits (Crop Group 11-09)[b]
		0.15	Coffee (green beans), rice
		0.05	Fat and meat byproducts of cattle, goats, horses, and sheep[c]
		0.02	Tree nuts (Crop Group 14), field corn, pistachios, popcorn grain
		0.01	Tuberous and corm vegetables (Crop Subgroup 1C, except potatoes[d]); eggs; fat, meat and meat byproducts of hogs and poultry

ppm = parts per million

[a] The MRL replaces the previously established 1.0 ppm MRL for stone fruits and establishes a new MRL for the additional commodities in the expanded 2009 crop group.

[b] The MRL replaces the previously established 0.3 ppm MRL for pome fruits and establishes a new MRL for the additional commodities in the expanded 2009 crop group.

[c] The MRL replaces the previously established 0.01 ppm MRL for fat and meat byproducts of the listed livestock.

[d] Potatoes were excluded from this MRL action as a 0.01 ppm MRL is already established for the commodity.

MRLs are established for each commodity included in the listed crop groupings in accordance with the Residue Chemistry Crop Groups webpage in the Pesticides and Pest Management section of Health Canada's website.

A list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
